#### Additional information

Full text of classification: see section 16

## **SECTION 4: First aid measures**

#### 4.1. Description of first aid measures

#### **General information**

In all cases of doubt, or when symptoms persist, seek medical advice. In case of unconsciousness give nothing by mouth, place in recovery position and seek medical advice.

#### In case of inhalation

Remove casualty to fresh air and keep warm and at rest. In case of irregular breathing or respiratory arrest provide artificial respiration.

#### Following skin contact

Take off immediately all contaminated clothing. After contact with skin, wash immediately with plenty of water and soap. Do not use solvents or thinners.

#### After eye contact

Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Seek medical advice immediately.

#### After ingestion

If swallowed, rinse mouth with water (only if the person is conscious). Seek medical advice immediately. Keep victim calm. Do NOT induce vomiting.

## 4.2. Most important symptoms and effects, both acute and delayed

In all cases of doubt, or when symptoms persist, seek medical advice.

4.3. **Indication of any immediate medical attention and special treatment needed** No special measures are necessary.

## SECTION 5: Firefighting measures

## 5.1. Extinguishing media

## Suitable extinguishing media:

alcohol resistant foam, carbon dioxide, Powder, spray mist, (water)

Extinguishing media which must not be used for safety reasons: strong water jet

## 5.2. Special hazards arising from the substance or mixture

Dense black smoke occurs during fire. Inhaling hazardous decomposing products can cause serious health damage.

## 5.3. Advice for firefighters

Provide a conveniently located respiratory protective device. Cool closed containers that are near the source of the fire. Do not allow water used to extinguish fire to enter drains, ground or waterways.

## SECTION 6: Accidental release measures

## 6.1. Personal precautions, protective equipment and emergency procedures

Keep away from sources of ignition. Ventilate affected area. Do not breathe vapours.

## 6.2. Environmental precautions

Do not allow to enter into surface water or drains. If the product contaminates lakes, rivers or sewages, inform competent authorities in accordance with local regulations.

## 6.3. Methods and material for containment and cleaning up

Isolate leaked material using non-flammable absorption agent (e.g. sand, earth, vermiculit, diatomaceous earth) and collect it for disposal in appropriate containers in accordance with the local regulations (see section 13). Clean using cleansing agents. Do not use solvents.

## 6.4. Reference to other sections

Observe protective provisions (see section 7 and 8).

## **SECTION 7: Handling and storage**

## 7.1. Precautions for safe handling

## Advices on safe handling

Avoid formation of flammable and explosive vapour concentrations in the air and exceeding the exposure limit values. Only

**FEYCOLOR**°

Article No.:	115-568	ALPOTECT Härter 568

Version:	4.0	Issue date: 11.10.2018

999998 EN Page 4 / 9

use the material in places where open light, fire and other flammable sources can be kept away. Electrical equipment must be protected meeting the accepted standard. Product may become electrostatically charged. Provide earthing of containers, equipment, pumps and ventilation facilities. Anti-static clothing including shoes are recommended. Floors must be electrically conductive. Keep away from heat sources, sparks and open flames. Use only spark proof tools. Avoid contact with skin, eyes and clothes. Do not inhale dusts, particulates and spray mist when using this preparation. Avoid respiration of swarf. When using do not eat, drink or smoke. Personal protection equipment: refer to section 8. Do not empty containers with pressure no pressure vessel! Always keep in containers that correspond to the material of the original container. Follow the legal protection and safety regulations.

## Precautions against fire and explosion:

Vapours are heavier than air. Vapours form explosive mixtures with air.

## 7.2. Conditions for safe storage, including any incompatibilities

## Requirements for storage rooms and vessels

Storage in accordance with the Ordinance on Industrial Safety and Health (BetrSiVO). Keep container tightly closed. Do not empty containers with pressure - no pressure vessel! Smoking is forbidden. Access only for authorised persons. Store carefully closed containers upright to prevent any leaks. Soils have to conform to the "Guidelines for avoidance of ignition hazards due to electrostatic charges (TRBS 2153)".

## Hints on joint storage

Keep away from strongly acidic and alkaline materials as well as oxidizers.

## Further information on storage conditions

Take care of instructions on label. Store in a well-ventilated and dry room at temperatures between 15 °C and 30 °C. Protect from heat and direct sunlight. Keep container tightly closed. Remove all sources of ignition. Smoking is forbidden. Access only for authorised persons. Store carefully closed containers upright to prevent any leaks.

## 7.3. Specific end use(s)

Observe technical data sheet.

## SECTION 8: Exposure controls/personal protection

## 8.1. Control parameters

## Occupational exposure limit values:

not applicable

## 8.2. Exposure controls

Provide good ventilation. This can be achieved with local or room suction. If this should not be sufficient to keep aerosol and solvent vapour concentration below the exposure limit values, a suitable respiratory protection must be used.

## **Occupational exposure controls**

## **Respiratory protection**

If concentration of solvents is beyond the occupational exposure limit values, approved and suitable respiratory protection must be used. Observe the wear time limits according GefStoffV in combination with the rules for using respiratory protection apparatus (BGR 190). Use only respiratory protection equipment with CE-symbol including four digit test number.

## Hand protection

For prolonged or repeated handling the following glove material must be used: NBR (Nitrile rubber)

Thickness of the glove material 0,7 mm; Breakthrough time (maximum wearing time) 60 min.

Observe the instructions and details for use, storage, maintenance and replacement provided by the protective glove manufacturer. Penetration time of glove material depending on intensity and duration of exposure to skin. Recommended glove articles DIN EN 374

Barrier creams can help protecting exposed skin areas. In no case should they be used after contact.

## Eye protection

Wear closely fitting protective glasses in case of splashes.

## **Protective clothing**

Wear antistatic clothing of natural fibers (cotton) or heat resistant synthetic fibers.

## **Protective measures**

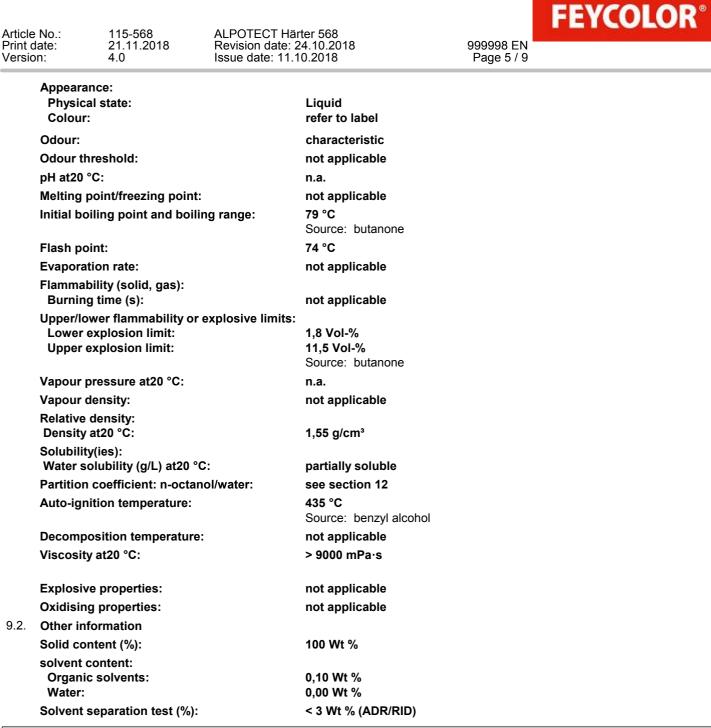

After contact clean skin thoroughly with water and soap or use appropriate cleanser.

#### Environmental exposure controls

Do not allow to enter into surface water or drains. See chapter 7. No additional measures necessary.

## **SECTION 9: Physical and chemical properties**

## 9.1. Information on basic physical and chemical properties

## SECTION 10: Stability and reactivity

#### 10.1. Reactivity

No information available.

## 10.2. Chemical stability

Stable when applying the recommended regulations for storage and handling. Further information on correct storage: refer to section 7.

#### 10.3. Possibility of hazardous reactions

Keep away from strong acids, strong bases and strong oxidizing agents to avoid exothermic reactions.

## 10.4. Conditions to avoid

Hazardous decomposition byproducts may form with exposure to high temperatures.

#### 10.5. **Incompatible materials** No information available.

10.6. **Hazardous decomposition products** Hazardous decomposition byproducts may form with exposure to high temperatures, e.g.: carbon dioxide, carbon monoxide,

## smoke, nitrogen oxides.

## **SECTION 11: Toxicological information**

Classification according to Regulation (EC) No 1272/2008 [CLP] No data on preparation itself available.

#### 11.1. Information on toxicological effects

## Acute toxicity, calculated:

ATEmix calculated, oral: 2258 mg/kg ATEmix calculated, dermal: > 5000 mg/kg ATEmix calculated, inhalative (vapours): > 20 mg/l

## Acute toxicity

benzyl alcohol oral, LD50, Rat: 1620 mg/kg Harmful if swallowed. dermal, LD50, Rabbit: 2000 mg/kg inhalative (vapours), LC50, Rat: (4 h) Harmful if inhaled.

1,3-Bis(aminomethyl)benzene oral, LD50, Rat: 930 mg/kg Harmful if swallowed. dermal, LD50, Rabbit: 3100 mg/kg inhalative (Gases), LC50, Rat: (4 h) Harmful if inhaled. inhalative (vapours), LC50, Rat: (4 h) Harmful if inhaled.

3-aminomethyl-3,5,5-trimethylcyclohexylamine oral, LD50, Rat: 1030 mg/kg Harmful if swallowed. dermal, LD50, Rat: > 2000 mg/kg Harmful in contact with skin. dermal, LD50, Rabbit: 1840 mg/kg Harmful in contact with skin.

Salicylic acid oral, LD50, Rat: 891 mg/kg Harmful if swallowed. dermal, LD50, Rat: > 2000 mg/kg

## skin corrosion/irritation; Serious eye damage/eye irritation

1,3-Bis(aminomethyl)benzene Skin (4 h) Causes severe skin burns and eye damage. Salicylic acid eyes Causes serious eye damage..

## Respiratory or skin sensitisation

1,3-Bis(aminomethyl)benzene Skin: May cause an allergic skin reaction.

## CMR effects (carcinogenicity, mutagenicity and toxicity for reproduction)

2-piperazin-1-ylethylamine Reproductive toxicity

Method: Suspected of damaging fertility or the unborn child.

## Specific target organ toxicity

Based on available data, the classification criteria are not met.

#### Practical experience/human evidence

Other observations:

Article No .:	115-568	ALPOTECT Härter 568	
Print date:	21.11.2018	Revision date: 24.10.2018	999998 EN
Version:	4.0	Issue date: 11.10.2018	Page 7 / 9

Inhaling of solvent components above the MWC-value can lead to health damage, e.g. irritation of the mucous membrane and respiratory organs, as well as damage to the liver, kidneys and the central nerve system. Indications for this are: headache, dizziness, fatigue, amyosthenia, drowsiness, in serious cases: unconsciousness. Solvents may cause some of the aforementioned effects through skin resorption. Repeated or prolonged contact with the preparation may cause removal of natural fat from the skin resulting in non-allergic contact dermatitis and/or absorption through skin. Splashing may cause eye irritation and reversible damage.

## **Overall Assessment on CMR properties**

The ingredients in this mixture do not meet the criteria for classification as CMR category 1A or 1B according to CLP.

## Remark

There is no information available on the preparation itself .

## **SECTION 12: Ecological information**

## overall evaluation

Classification according to Regulation (EC) No 1272/2008 [CLP] There is no information available on the preparation itself . Do not allow to enter into surface water or drains.

## 12.1. Toxicity

Toxicological data are not available.

## Long-term Ecotoxicity

Toxicological data are not available.

- 12.2. Persistence and degradability No information available.
- 12.3. Bioaccumulative potential
  - No information available.

**Bioconcentration factor (BCF)** 

No information available.

12.4. Mobility in soil

# No information available.

12.5. Results of PBT and vPvB assessment

The substances in the mixture do not meet the PBT/vPvB criteria according to REACH, annex XIII.

## 12.6. Other adverse effects

No information available.

## **SECTION 13: Disposal considerations**

## 13.1. Waste treatment methods

## Appropriate disposal / Product

## Recommendation

Do not allow to enter into surface water or drains. This material and its container must be disposed of in a safe way. Waste disposal according to directive 2008/98/EC, covering waste and dangerous waste.

#### List of proposed waste codes/waste designations in accordance with EWC 080111

Waste paint and varnish containing organic solvents or other dangerous substances

## packaging

Recommendation

Non-contaminated packages may be recycled. Vessels not properly emptied are special waste.

## **SECTION 14: Transport information**

SECTION 16: Other information						
Full text of classification in section 3:						

	cation in section 3:				
Acute Tox. 4 / H302		Harmful if swallowed.			
Acute Tox. 4 / H332		Harmful if inhaled.			
Eye Irrit. 2 / H319	Serious eye damage/eye irritation	Causes serious eye irritation.			
Acute Tox. 4 / H312	• • •	Harmful in contact with skin.			
Skin Corr. 1B / H314		Causes severe skin burns and eye damage.			
Skin Sens. 1 / H317		May cause an allergic skin reaction.			
Aquatic Chronic 3 / H					
Aquatic Chronic 2 / H	H411 Hazardous to the aquatic environm				
Eye Dam. 1 / H318	Serious eye damage/eye irritation	Causes serious eye damage.			
Skin Corr. 1C / H314	4 skin corrosion/irritation	Causes severe skin burns and eye damage.			
Skin Sens. 1B / H31	7 Respiratory or skin sensitisation	May cause an allergic skin reaction.			
Acute Tox. 3 / H311	Acute toxicity (dermal)	Toxic in contact with skin.			
Repr. 2 / H361	Reproductive toxicity	Suspected of damaging fertility or the unborn			
		child (state specific effect if known) (state route			
		of exposure if it is conclusively proven that no			
		other routes of exposure cause the hazard).			
STOT RE 1 / H372	Specific target organ toxicity (repea	ated Causes damage to organs (or state all organs			
	exposure)	affected, if known) through prolonged or			
		repeated exposure (state route of exposure if it			
		is conclusively proven that no other routes of			
		exposure cause the hazard).			
Skin Irrit. 2 / H315	skin corrosion/irritation	Causes skin irritation.			
Abbreviations and	acronyms				
ADR		tional des marchandises dangereuses par route (European			
	Agreement concerning the International Car	riage of Dangerous Goods by Road)			
AGW (WEL)	Occupational Exposure Limit Value				
CAS	Chemicals Abstract Service				
CLP	Classification, Labelling and Packaging				
CMR	Carcinogenic, Mutagenic and Reprotoxic				
DNEL	Derived No-Effect Level				
IATA-DGR	International Air Transport Association – Dar	ernational Air Transport Association – Dangerous Goods Regulations			
ICAO-TI		ernational Civil Aviation Organization Technical Instructions for the Safe Transport of Dangerous			
	Goods by Air				
IMDG Code	International Maritime Code for Dangerous C	Goods			
PBT	persistent, bioaccumulative, toxic	persistent, bioaccumulative, toxic			
PNEC	Predicted No Effect Concentration	Predicted No Effect Concentration			
REACH	egistration, Evaluation, Authorisation and Restriction of Chemicals				
RID	èglement concernant le transport international ferroviaire de marchandises Dangereuses				
	(Regulations concerning the International Ca	arriage of Dangerous Goods by Rail)			
UN	United Nations	ited Nations			
LC	Lethal Concentration				
LD	Lethal Dose				
VOC	Volatile Organic Compounds				
vPvB	very persistent and very bioaccumulative	ry persistent and very bioaccumulative			
Further information	n				

Classification according to Regulation (EC) No 1272/2008 [CLP]

The information supplied on this safety data sheet complies with our current level of knowledge as well as with national and EU regulations. Without written approval, the product must not be used for purposes different from those mentioned in chapter 1. It is always the user's duty to take any necessary measures for meeting the requirements laid down by local rules and regulations. The details in this safety data sheet describe the safety requirements of our product and are not to be regarded as guaranteed attributes of the product.
