Additional information

Full text of classification: see section 16

**SECTION 4: First aid measures** 

Article No.:	295	FEYCOZINK 295 ZF		<b>FEYCOLOR</b> °
Print date:	21.11.2018	Revision date: 08.11.2018	999998 EN	
Version:	1.7	Issue date: 11.10.2018	Page 3 / 11	

#### 4.1. Description of first aid measures

#### **General information**

In all cases of doubt, or when symptoms persist, seek medical advice. In case of unconsciousness give nothing by mouth, place in recovery position and seek medical advice.

#### In case of inhalation

Remove casualty to fresh air and keep warm and at rest. In case of irregular breathing or respiratory arrest provide artificial respiration.

#### Following skin contact

Take off immediately all contaminated clothing. After contact with skin, wash immediately with plenty of water and soap. Do not use solvents or thinners.

#### After eye contact

Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Seek medical advice immediately.

#### After ingestion

If swallowed, rinse mouth with water (only if the person is conscious). Seek medical advice immediately. Keep victim calm. Do NOT induce vomiting.

#### 4.2. Most important symptoms and effects, both acute and delayed

In all cases of doubt, or when symptoms persist, seek medical advice.

4.3. **Indication of any immediate medical attention and special treatment needed** No special measures are necessary.

### **SECTION 5: Firefighting measures**

### 5.1. Extinguishing media

#### Suitable extinguishing media:

alcohol resistant foam, carbon dioxide, Powder, spray mist, (water)

### Extinguishing media which must not be used for safety reasons:

strong water jet

### 5.2. Special hazards arising from the substance or mixture

Dense black smoke occurs during fire. Inhaling hazardous decomposing products can cause serious health damage.

### 5.3. Advice for firefighters

Provide a conveniently located respiratory protective device. Cool closed containers that are near the source of the fire. Do not allow water used to extinguish fire to enter drains, ground or waterways.

### SECTION 6: Accidental release measures

### 6.1. Personal precautions, protective equipment and emergency procedures

Keep away from sources of ignition. Ventilate affected area. Do not breathe vapours.

### 6.2. Environmental precautions

Do not allow to enter into surface water or drains. If the product contaminates lakes, rivers or sewages, inform competent authorities in accordance with local regulations.

#### 6.3. Methods and material for containment and cleaning up

Isolate leaked material using non-flammable absorption agent (e.g. sand, earth, vermiculit, diatomaceous earth) and collect it for disposal in appropriate containers in accordance with the local regulations (see section 13). Clean using cleansing agents. Do not use solvents.

### 6.4. Reference to other sections

Observe protective provisions (see section 7 and 8).

### SECTION 7: Handling and storage

### 7.1. Precautions for safe handling

### Advices on safe handling

Avoid formation of flammable and explosive vapour concentrations in the air and exceeding the exposure limit values. Only use the material in places where open light, fire and other flammable sources can be kept away. Electrical equipment must be protected meeting the accepted standard. Product may become electrostatically charged. Provide earthing of containers, equipment, pumps and ventilation facilities. Anti-static clothing including shoes are recommended. Floors must be electrically conductive. Keep away from heat sources, sparks and open flames. Use only spark proof tools. Avoid contact with skin, eyes

Article No.:	295	FEYCOZINK 295 ZF		1000
Print date: Version:	21.11.2018	Revision date: 08.11.2018 Issue date: 11.10.2018	999998 EN Page 4 / 11

and clothes. Do not inhale dusts, particulates and spray mist when using this preparation. Avoid respiration of swarf. When using do not eat, drink or smoke. Personal protection equipment: refer to section 8. Do not empty containers with pressure - no pressure vessel! Always keep in containers that correspond to the material of the original container. Follow the legal protection and safety regulations.

### Precautions against fire and explosion:

Vapours are heavier than air. Vapours form explosive mixtures with air.

### 7.2. Conditions for safe storage, including any incompatibilities

### Requirements for storage rooms and vessels

Storage in accordance with the Ordinance on Industrial Safety and Health (BetrSiVO). Keep container tightly closed. Do not empty containers with pressure - no pressure vessel! Smoking is forbidden. Access only for authorised persons. Store carefully closed containers upright to prevent any leaks. Soils have to conform to the "Guidelines for avoidance of ignition hazards due to electrostatic charges (TRBS 2153)".

### Hints on joint storage

Keep away from strongly acidic and alkaline materials as well as oxidizers.

### Further information on storage conditions

Take care of instructions on label. Store in a well-ventilated and dry room at temperatures between 15 °C and 30 °C. Protect from heat and direct sunlight. Keep container tightly closed. Remove all sources of ignition. Smoking is forbidden. Access only for authorised persons. Store carefully closed containers upright to prevent any leaks.

### 7.3. Specific end use(s)

Observe technical data sheet.

### SECTION 8: Exposure controls/personal protection

### 8.1. Control parameters

### Occupational exposure limit values: **Xvlene** INDEX No. 601-022-00-9 / EC No. 215-535-7 / CAS No. 1330-20-7 WEL. TWA: 220 mg/m3: 50 ppm WEL, STEL: 441 mg/m3; 100 ppm BMGV. Remark: (> or = C7, Normal and branched chain alkanes) WEL, TWA: 800 mg/m3 Remark: (> or = C7, Cycloalkanes)

### Additional information

TWA : long-term occupational exposure limit value STEL : short-term occupational exposure limit value Ceiling : peak limitation

### 8.2. Exposure controls

Provide good ventilation. This can be achieved with local or room suction. If this should not be sufficient to keep aerosol and solvent vapour concentration below the exposure limit values, a suitable respiratory protection must be used.

### Occupational exposure controls

### **Respiratory protection**

If concentration of solvents is beyond the occupational exposure limit values, approved and suitable respiratory protection must be used. Observe the wear time limits according GefStoffV in combination with the rules for using respiratory protection apparatus (BGR 190). Use only respiratory protection equipment with CE-symbol including four digit test number.

### Hand protection

For prolonged or repeated handling the following glove material must be used: NBR (Nitrile rubber)

Thickness of the glove material 0,7 mm; Breakthrough time (maximum wearing time) 60 min.

Observe the instructions and details for use, storage, maintenance and replacement provided by the protective glove manufacturer. Penetration time of glove material depending on intensity and duration of exposure to skin. Recommended glove articles DIN EN 374

Barrier creams can help protecting exposed skin areas. In no case should they be used after contact.

### Eye protection

Wear closely fitting protective glasses in case of splashes.

### **Protective clothing**

Wear antistatic clothing of natural fibers (cotton) or heat resistant synthetic fibers.

### Protective measures

After contact clean skin thoroughly with water and soap or use appropriate cleanser.

### Environmental exposure controls

Do not allow to enter into surface water or drains. See chapter 7. No additional measures necessary.

### **SECTION 9: Physical and chemical properties**

### 9.1. Information on basic physical and chemical properties

Appearance:	
Physical state:	Liquid
Colour:	refer to label
Odour:	characteristic
Odour threshold:	not applicable
pH at20 °C:	n.a.
Melting point/freezing point:	not applicable
Initial boiling point and boiling range:	78 °C
	Source: ETHANOL (ETHYLALKOHOL)
Flash point:	23 °C
Evaporation rate:	not applicable
Flammability (solid, gas):	
Burning time (s):	not applicable
Upper/lower flammability or explosive limits:	
Lower explosion limit:	0,85 Vol-%
Upper explosion limit:	15 Vol-%
	Source: Ethanol
Vapour pressure at20 °C:	1,5994 mbar
Vapour density:	not applicable
Relative density:

### skin corrosion/irritation; Serious eye damage/eye irritation

Xylene Skin (4 h)

Causes skin irritation. eyes Causes serious eye irritation.

### Respiratory or skin sensitisation

Based on available data, the classification criteria are not met.

### CMR effects (carcinogenicity, mutagenicity and toxicity for reproduction)

Based on available data, the classification criteria are not met.

### Specific target organ toxicity

Solvent naphtha (petroleum), light arom. Specific target organ toxicity (single exposure), Irritation: May cause respiratory irritation. Specific target organ toxicity (single exposure), drowsiness: May cause drowsiness or dizziness.

#### **Xylene**

Specific target organ toxicity (single exposure), Irritation: May cause respiratory irritation. Specific target organ toxicity (repeated exposure):

Kohlenwasserstoffe, C9-C11, n-Alkane, Isoalkane, Cyclene, < 2% Aromaten Specific target organ toxicity (single exposure), drowsiness: May cause drowsiness or dizziness.

### Aspiration hazard

Solvent naphtha (petroleum), light arom. Aspiration hazard

May be harmful if swallowed.

### Xylene

Aspiration hazard

May be fatal if swallowed and enters airways.

Kohlenwasserstoffe, C9-C11, n-Alkane, Isoalkane, Cyclene, < 2% Aromaten

Aspiration hazard

May be fatal if swallowed and enters airways.

Repeated exposure may cause skin dryness or cracking.

### Practical experience/human evidence

Other observations:

Inhaling of solvent components above the MWC-value can lead to health damage, e.g. irritation of the mucous membrane and respiratory organs, as well as damage to the liver, kidneys and the central nerve system. Indications for this are: headache, dizziness, fatigue, amyosthenia, drowsiness, in serious cases: unconsciousness. Solvents may cause some of the aforementioned effects through skin resorption. Repeated or prolonged contact with the preparation may cause removal of natural fat from the skin resulting in non-allergic contact dermatitis and/or absorption through skin. Splashing may cause eye irritation and reversible damage.

### **Overall Assessment on CMR properties**

The ingredients in this mixture do not meet the criteria for classification as CMR category 1A or 1B according to CLP.

### Remark

There is no information available on the preparation itself .

### **SECTION 12: Ecological information**

### overall evaluation

Classification according to Regulation (EC) No 1272/2008 [CLP] There is no information available on the preparation itself . Do not allow to enter into surface water or drains.

### 12.1. Toxicity

Solvent naphtha (petroleum), light arom. Fish toxicity, LC50, Oncorhynchus mykiss (Rainbow trout): 9,2 mg/l (96 h) Daphnia toxicity, EC50, Daphnia magna: 3,2 mg/l (48 h) Algae toxicity, ErC50, Algae: 2,6 mg/l

#### **Xylene**

Fish toxicity, LC50, Oncorhynchus mykiss (Rainbow trout): 2,6 mg/l (96 h) Daphnia toxicity, EC50, Daphnia magna (Big water flea): 1 mg/l (48 h)

Kohlenwasserstoffe, C9-C11, n-Alkane, Isoalkane, Cyclene, < 2% Aromaten Fish toxicity, LC50, Oncorhynchus mykiss (Rainbow trout): 3,6 mg/l (96 h) Daphnia toxicity, EC50, Daphnia magna: 22 mg/l (48 h)

### Long-term Ecotoxicity

Solvent naphtha (petroleum), light arom. Fish toxicity, LC50: (96 h) Toxic to aquatic life with long lasting effects. Fish toxicity, NOEC, Oncorhynchus mykiss (Rainbow trout): 1,23 mg/l (28 d) Daphnia toxicity, NOEC, Daphnia magna: 2,14 mg/l (21 d)

Kohlenwasserstoffe, C9-C11, n-Alkane, Isoalkane, Cyclene, < 2% Aromaten Fish toxicity, NOEC, Oncorhynchus mykiss (Rainbow trout): 0,0132 mg/l (28 d) Daphnia toxicity, NOEC, Daphnia magna: (21 d)

#### 12.2. Persistence and degradability No information available.

### 12.3. Bioaccumulative potential

No information available.

### **Bioconcentration factor (BCF)**

Xylene

Bioconcentration factor (BCF), Oncorhynchus mykiss (Rainbow trout): 25,9

### 12.4. Mobility in soil

No information available.

### 12.5. Results of PBT and vPvB assessment

The substances in the mixture do not meet the PBT/vPvB criteria according to REACH, annex XIII.

### 12.6. Other adverse effects

No information available.

### **SECTION 13: Disposal considerations**

### 13.1. Waste treatment methods

### Appropriate disposal / Product

### Recommendation

Do not allow to enter into surface water or drains. This material and its container must be disposed of in a safe way. Waste disposal according to directive 2008/98/EC, covering waste and dangerous waste.

### List of proposed waste codes/waste designations in accordance with EWC

080111 Waste paint and varnish containing organic solvents or other dangerous substances

### packaging

### Recommendation

Non-contaminated packages may be recycled. Vessels not properly emptied are special waste.

### **SECTION 14: Transport information**

### **SECTION 16: Other information**

Full text of classification	Full text of classification in section 3:		
		Very toxic to aquatic organisms.	
Aquatic Chronic 1 / H410	Hazardous to the aquatic environment	Very toxic to aquatic life with long lasting	
·	······································	effects.	
Acute Tox. 4 / H312	Acute toxicity (dermal)	Harmful in contact with skin.	
Acute Tox. 4 / H332	Acute toxicity (inhalative)	Harmful if inhaled.	
Skin Irrit. 2 / H315	skin corrosion/irritation	Causes skin irritation.	
Flam. Liq. 3 / H226	Flammable liquids	Flammable liquid and vapour.	
STOT SE 3 / H335	Specific target organ toxicity (single exposure)	May cause respiratory irritation.	
Aquatic Chronic 2 / H411	Hazardous to the aquatic environment	Toxic to aquatic life with long lasting effects.	
Asp. Tox. 1 / H304	Aspiration hazard	May be fatal if swallowed and enters airways.	
STOT SE 3 / H336	Specific target organ toxicity (single exposure)	May cause drowsiness or dizziness.	
Flam. Liq. 2 / H225	Flammable liquids	Highly flammable liquid and vapour.	
STOT RE 2 / H373	Specific target organ toxicity (repeated	May cause damage to organs (or state all	
	exposure)	organs affected, if known) through prolonged or	
		repeated exposure (state route of exposure if it	
		is conclusively proven that no other routes of	
Aquatia Chronia 2 / H412	Upperdaup to the equatio equipment	exposure cause the hazard).	
Aquatic Chronic 3 / H412 Flam. Sol. 1 / H228	Hazardous to the aquatic environment flammable solids	Harmful to aquatic life with long lasting effects. Flammable solid.	
Eye Irrit. 2 / H319	Serious eye damage/eye irritation	Causes serious eye irritation.	
Carc. 2 / H351	Carcinogenicity	Suspected of causing cancer (state route of	
		exposure if it is conclusively proven that no	
		other routes of exposure cause the hazard).	
Eye Dam. 1 / H318	Serious eye damage/eye irritation	Causes serious eye damage.	
Skin Sens. 1 / H317	Respiratory or skin sensitisation	May cause an allergic skin reaction.	
Skin Sens. 1A / H317	Respiratory or skin sensitisation	May cause an allergic skin reaction.	
Repr. 2 / H361	Reproductive toxicity	Suspected of damaging fertility.

#### Further information

Classification according to Regulation (EC) No 1272/2008 [CLP]

The information supplied on this safety data sheet complies with our current level of knowledge as well as with national and EU regulations. Without written approval, the product must not be used for purposes different from those mentioned in chapter 1. It is always the user's duty to take any necessary measures for meeting the requirements laid down by local rules and regulations. The details in this safety data sheet describe the safety requirements of our product and are not to be regarded as guaranteed attributes of the product.
